Full details of all events are circulated to members of AHP and are available from AHP Enquiries (ref S&S), 62 Linkside, London W12 7LG, or phone our ansaphone on 01-346-6515.

AN ANTIPODEAN TYPEWRITER'S POINT OF VIEW

Some of the Growth Centre helpers are becoming familiar with the new typewriter Like so many ordinary things, even a typewriter can present challenges, forcing us to change our way of thinking and of doing things and so avoid complacency.

The old typewriter had the idiosyncracies a machine its age was entitled to. There were two characters I, at least, had trouble with - the comma, which the machine printed spasmodically, and the full stop, which it nearly always refused to print. Now you know one secret of earlier copies of the newsletter. A lot of the full stops were personally hand made by our editor!

After being thwarted many times in my attempts to put in the full stops, I finally settled on leaving an extra space at the end of each sentence. "What use does a Growth Centre have for a full stop anyway?" I thought. The philosophy of the Centre seems to deny the existence of such a thing as a full stop. As the typewriter sometimes conceded, there are occasional pauses - the commas - but no full stops. A space and a glorious new capital letter indicate beginnings, not endings. It was just the right typewriter for a Growth Centre, I decided, and so it was with some regret that I heard it had been retired.

I admit the new machine has its place - but I rather like a typewriter that wont print full stops.

Judy Fitzimmon
