

# **The Great Awakening: Political and Pharmaceutical Deceits Now Revealed<sup>1</sup>**

**Paul & Sinziana Barber**

## **An Invitation and Challenge**

It is almost laughable to ponder upon where it all started and nearly grim and shameful when we realize as humans that we are reckless, careless, and foolish.

Santosh Kalwar

In the following pages we remove the wrapping of fraudulent news to reveal how the spectre of a pandemic was used to coerce society into submission. To thank for this we have the co-ordinated forces of a greedy pharmaceutical industry, shadowy governmental controls plus an over-trusting population compliant in their ruination. A population which is already suffering record highs of bankruptcy, depression and suicide (WHO, 2022a), and, post-lockdown, awaiting the worst recession in living history. The aim was to eradicate Covid – but the result? Ineffective vaccinations causing more hospitalisations than the original virus (Jones, W., 2022) and growing cases of autoimmunity (Exposé, 2022c). If this weren't enough, and especially pertinent to *Self & Society* readers, is the destruction of human rights and the desecration of the human soul.

We have all played a part in this all too real-life horror story.

Many who believe in the co-creation of humane, just, compassionate and democratic communities have been hood-winked into allowing all that's best in us to be destroyed. It's not entirely our fault that we fell for the prevailing chronicle;

were we not primed to believe that politicians and medical experts, for all their personal flaws, were trying to do the best they can? To enhance compliance, governments used mass psychology, orchestrated fear (Rayner & Halligan, 2021) and censored news (Ulfkotte, 2020) to keep us malleable. These ploys worked excellently, and on too many are working still. But now, finally, we perceive a wind of change blowing in the air.

From the jig-saw of information in our article below, drawn from research studies, social and statistical surveys, news leaks and the accounts of ex-insiders, we invite you to build your own picture. It will be a very different one to that officially broadcast by government, news media and Big Pharma – guilty agencies who have a vested interest in suppressing truth.

Personally, although we would love to believe otherwise, reading between the lines it appears that a group of powerful people regard the ordinary members of the public as surplus to their requirements. We, the public, don't see through all this because evil makes us feel bad, sad, disturbed and deeply uncomfortable. We resist accepting that the world could work this

way, for denial of unpleasant reality is part of our everyday copying mechanism. Nevertheless, uncomfortable facts must be faced if we are to awake to what's before us.

With Covid, even if we accept pharmaceutical bribes, commercial corruption and medical incompetence, does there not have to be another over-arching agenda for conspiracy of this proportion to thrive? How else could blunders of such magnitude have been tolerated, condoned and successful without large-scale subterfuge sanctioned by our appointed guardians and rulers? There are few nurturing parents in our story, but many controlling and power-hungry ones. Are we, then, 'Lost Children'?

With regards to the criminal reasons behind the Covid pandemic, the following are most widely circulated:

- 1 Culling of the world population via vaccination;
- 2 Experimental implementation of mass control;
- 3 Paving the way for an economic power-driven global financial re-set.

God forbid that all three do not operate at once! Though there is much speculation and some evidence, they were designed to work hand-in-hand towards societal recalibration.

Everything, of course, remains unproven to the uninformed public eye, but disturbing data keep pumping out via litigation within law courts, whistle-blowers jumping ship, and courageous individuals like Robert F. Kennedy Jr (Kennedy, 2021) for us to consider some pretty shocking accusations, which we herein survey under the following headings:

- Suspicious of a Plan-demic...
- Bribes and inflated figures of pandemic deaths...
- Formally denied side-effects of vaccinations now emerging....
- The ineffectiveness of vaccination...
- Culpability of Big Pharma...
- Draconian intentions of governments and WHO...
- Press and news suppression...

Over-estimation of vaccine take-up...

Under the above headers we share factual reportage prior to a brief synopsis; at the close, we conclude our findings.

We believe the information here will bring you up to speed and initiate you into the ranks of the 'informed public'.

Taken as a whole, our *Self & Society* articles to date represent a naive reflective study, with hypotheses floated in the earlier pieces and a review of findings in this, our final offering. No doubt some of you are tired of our Covid publications – 'same old same old', as it were. But our earlier deliberations about lethal side-effects and the ineffectiveness of vaccines, bribery in high places and corruption, plus 'propagandisation' of the news (Barber & Barber, 2022) are proved here to have all come true. After reading this article, you will have sufficient data to make up your own mind.

What a story to tell the world how Coronavirus has become impotent and friendless to reward ultra rich with more rights.

Qamar Rafiq

## Suspicious of a Plan-demic

Each wave of terrorizing... creates its effects more easily – after a breathing spell – than the one that preceded it because people are still disturbed by their previous experience. Morality becomes lower and lower, and the psychological effects of each new propaganda campaign become stronger; it reaches a public already softened up.

Joost Meerloo

In 2017 and 2018 every nation on earth started buying and selling millions upon millions of virus test kits labelled 'Covid19 Test Kits'; you can still see this on the website of the World Integrated Trade Solution! How could so much be prepared and so many nations be in 'the know' so early on? What is more, only five months before the coronavirus outbreak, WHO instructed all the nations to immediately prepare for an imminent world influenza pandemic. Similar foresight caused the Australian

government to publish a manual for a coronavirus pandemic a few months before it even surfaced! Are we ruled by magicians blessed with foresight?

If the above weren't enough to raise suspicions, why do American government records show that the US Department of Defense (DOD) awarded a contract, on the 12 November 2019, to Labyrinth Global Health Inc., for 'COVID-Research', interestingly in the Ukraine, one month before the alleged emergence of a novel coronavirus, and three months before Covid was officially dubbed 'Covid-19' or known to exist? In relation to Covid's possible link to bacterial warfare, is Peter Daszak a bridge? Daszak was first involved with weaponising drugs, then employed by the US government as a Covid Health Advisor! And his health advice? In a minuted public meeting he advised, 'We must create public hype to get the public to accept an international virus vaccine' (Shilhavy, 2021). What do you make of this? Although Corona virus was declared a dead issue and supposedly written off by the WHO in 2007, why did the US government continue to spend millions of dollars upon it? Could it be that Corona was seen as a highly malleable bio-weapon, so its research went underground in military labs? More disturbingly, it appears we all became the enemy towards whom it was directed!

The person who technically owns the World Health Organisation, through his financing of it, is Bill Gates, the number 1 vaccine dealer in the world, who predicted: 'There is no doubt in anyone's mind that we will experience a surprise outbreak of an infectious disease during the first term of the Trump administration' (Kennedy, 2021). Such foresight! More recently, he has gone on public record threatening, 'We've not seen the worst of Covid'. Clearly a continuing pandemic is in certain people's interests. It is common knowledge that the World Health Organisation had an official plan primed for ten years of ongoing infectious diseases, from 2020 to 2030, which they entitled 'A Decade of Pandemics' – all ready and willing to go when Covid arrived! The decade ends as a formally recognised United Nations, WHO and Bill Gates

initiative geared towards worldwide centralisation of eco-political power comes into play – namely, 'Agenda 2030'. Is someone merrily planning a take-over?

To iron out any further doubts, consider Dr David Martin's testimony to the Corona Investigative Committee (DSA, 2021), in which he states:

The National Institute of Health's grant AI23946-08, issued to Dr. Ralph Baric at the University of North Carolina at Chapel Hill (officially classified as affiliated with Dr. Anthony Fauci's NIAID by 2003), shows they began work on synthetically altering the Coronaviridae (the coronavirus family) for the express purpose of general research, pathogenic enhancement, detection, manipulation, and potential therapeutic interventions targeting Covid, as early as May 21, 2000, at which time Dr. Baric and UNC sought to patent critical sections of the coronavirus family for their commercial benefit. (ibid.)

In one of several papers sponsored by this grant, Dr Baric published what he reported to be the full length cDNA of SARS CoV; here it is clearly stated that SAR CoV was based on a composite of DNA segments:

Using a panel of contiguous cDNAs that span the entire genome, we have assembled a full-length cDNA of the SARS-CoV Urbani strain, and have rescued molecularly cloned SARS viruses (infectious clone SARS-CoV) that contained the expected marker mutations inserted into the component clones. (ibid.)

In line with this, on 19 April 2002, long before the first SARS outbreak in Asia, Christopher Curtis, Boyd Yount and Ralph Baric filed an application for US Patent 7,279,372 for a method of producing recombinant coronavirus as a means of producing 'an infectious, replication defective, coronavirus'. In short, the US Department of Health and Human Services was involved in the funding of amplifying the infectious nature of coronavirus between 1999 and 2002, way before SARS was detected in humans! Can we ever doubt that Coronavirus

came from a laboratory? With great difficulty, we respectfully suggest.

Many portents of Covid reached the public prior to 2000, which caused many to suggest we were being softened up for the kill! For instance, in 2003 the TV series *Dead Zone* aired an episode entitled 'The Plague', showing a coronavirus pandemic. Everything we experienced was shown: Chinese origin of the virus, masks, lockdowns, quarantines, test swabs! Even a cure was mentioned – chloroquine! In like vein, a musician in 2013 composed a song about a coronavirus pandemic that would occur in 2020! He said he could predict this because he had been investigating so-called 'conspiracy theories'. In 2006 a movie was also released called *V for Vendetta*, which depicts a coronavirus pandemic that results in worldwide tyranny. The theme repeated throughout the movie is 'This is for your safety'! So, clairvoyance, or something more sinister? One has to ask whether we were being subject to subconscious psychic preparation and subliminal preparation. Even the UN got into the act of prophesying pandemics when, in 2012, they published a comic book titled *Infected*, which tells the story of a global pandemic that starts in a market in China, leads up to worldwide medical tyranny – praised as the best solution. You can download this comic now from the UN website cited in the bibliography (UN, 2012). Taken together, all these tend to suggest, as in mass psychology, that we were possibly being primed (an old KBG ploy) to expect a pandemic.

Dr Reiner Fuellmich, an international trial lawyer who has successfully sued large fraudulent corporations like Volkswagen and Deutsche Bank, has assembled a worldwide network of lawyers who have listened to over a hundred experts from every field of science. Reiner claims to have collected undeniable evidence that the Covid pandemic was in fact a planned criminal operation. According to him, a second Nuremberg trial may be needed to prosecute all who are complicit in this unprecedented crime against humanity. Besides enrolling other international lawyers and a judge, Dr Fuellmich has organised a Grand Jury proceedings, where experts from the WHO, UN,

CDC, Pfizer, the Military and Secret Services are all presenting evidence that Covid was a criminal planned operation (Exposé, 2021). Either Dr Fuellmich has gone mad and his many witnesses likewise, or mass conspiracy is well nigh proven! Note that a criminal court in Peru has already ruled this pandemic to have been a criminal operation run by Bill Gates, the Rockefellers, George Soros and other billionaires.

The notion of a 'plan-demic' is further credited by Marion Koopmans, a WHO virologist from The Netherlands working at the Wuhan bio-lab, who confirmed on Dutch television that the World Health Organisation had been working on the Covid agenda for many years, while at the same time developing a Pandemic Treaty, which gives them complete totalitarian control over all the nations in the world, so that whenever they declare a pandemic, something they can do whenever they want to, based on any test they choose – governments will have to obey! Luckily, WHO's megalomaniac machinations of a Pandemic Treaty were recently stalled by a consortium of Third World nations and Russia, who refused to sign their consent, though it had already been signed by governments in Europe and the USA.

As widely predicted, another 'pandemic' named Monkeypox (Jones, 2022) stands waiting in the wings poised to take Covid's place. This infection mimics symptoms of Covid jab-induced shingles – so much so that the Department of Health in Queensland, Australia, used the same photo to illustrate both infections! These photos have since been removed from their website. Please note:

Unless there has been some genetic alteration, either through evolution or intentional genetic manipulation, [monkeypox] is not a significant bio threat, and has never been considered a high threat pathogen in the past. So, stop the fear mongering, misinformation and disinformation. (Dr Robert Malone in Fearless Speech, 2022)

Monkeypox is a virus that is endemic in Africa which emerges sporadically after transmission into humans from animal hosts; it is typically

spread by close human contact, and is readily controlled by classical public health measures. It does not have a high mortality rate. So please remove from your mind the necessity of standing in line for your Monkeypox vaccination. Ask also what happened to Omicron, Delta and Alpha. Did they just go out of fashion as fear mongering moved on?

*Authors' comments:* The conspiratorial nature of the pandemic was picked up early (Anon, 2020; AFRAO, 2020). Covid's human-made origins are further confirmed in records from The Patents Office January 2000 to June 2008. First, consider investigation of canine coronavirus gene uses on 28 January 2000 by Pfizer Inc. (<https://patents.justia.com/patent/6372224>). Secondly, the subsequent isolation of Corona virus from humans on 12 April 2004, also by Pfizer (<https://patents.justia.com/patent/7220852>). Thirdly, the ongoing investigation into antiviral agents for the treatment, control and prevention of infections by coronaviruses on 28 April 2004, by Sequoia Pharmaceuticals Inc. (<https://patents.justia.com/patent/7151163>). Finally, the investigation of amino acid sequences directed against envelope proteins of a virus and polypeptides for the treatment of viral diseases upon 5 June 2009 by Ablynx NV (<https://patents.justia.com/patent/919378>).

Sceptics amongst you – please click any of the above patent references to read the facts for yourself. WHO appears to have very powerful political ambitions. We tend to forget how large commercial enterprises wield more power than many nation states – enabling the likes of Bill Gates to force 'his version of reality' on to us. Considering the above Patent Office records extending back to 2000, military involvement and preparation of the public mind-set by pandemic films and dramas, the notion of a pandemic appears far from circumstantial. In trying to push through Monkeypox as an International Emergency, even though US Government data agrees it is impossible to distinguish between Monkeypox, chickenpox and shingles, WHO appears highly invested in repeating their earlier Covid form! More tellingly, as Covid-19 vaccinations increase the risk of singles by a

shocking 4,925 per cent (Exposé, 2022f), WHO appears to have set the conditions for a further pandemic. Unsurprisingly, the main clusters of Monkeypox (vaccine-induced shingles) are emerging in areas where Pfizer vaccinations predominated!

Menticide (brainwashing) is an old crime against the human mind and spirit but systematized anew. It is an organized system of psychological intervention and judicial perversion through which a [ruling class] can imprint [their] own opportunistic thoughts upon the minds of those [they] plan to use and destroy.

Joost Meerloo

## Bribes and Inflated Figures

We've seen repeated cases of corruption, and that is the second pandemic in many ways.

Johnathan Cushing, Transparency International  
Global Health Team

Dr Scott Jensen, Senator of Minnesota, put on public record via Fox News that 'Hospitals receive as much as 13,900 dollars for every patient they register as Covid-19. For every death resulting from Covid-19, that amount is tripled to: 30,900 USD' (Jensen, 2020). On a far lesser scale, some Romanian GPs offered £100 to poor folk in the provinces to take the vaccine. We personally have already uncovered, locally, monetary incentives for re-classification of those otherwise dead, to Covid deaths. One of the informants for our earlier Covid articles was an Orthodox Priest who was asked to confirm a Covid death for a road traffic accident victim. He refused, and went public on TV! Also note that death from any cause within 28 days of a positive test for SARS-CoV-2 is recorded in several countries as a 'Covid death'!

There are literally scores of viruses, even common cold viruses, which infect the human airway in elderly and infirm people to give rise to severe illness. But these appear to have magically disappeared since the advent of Covid! Lest we forget about prior conditions contributing to Covid deaths, of 29,135 Covid deaths registered in Romania until April 2021 (Statistica, 2021), only 227 were admitted by the Minister of Health to have died of Covid alone,

without severe aggravating prior conditions! – thus proving a massive exaggeration of figures to the tune of 28,908 excess deaths! Please ask yourself why was it so important to lie to us.

*Authors' comments:* Obviously, there was a concerted effort from many quarters to inflate and escalate Covid figures in order to glorify the pandemic's potency. Bribes were paid to this end, and health policies modified. We mentioned in an earlier article that if you once test positive in the UK you can end up being registered 'Covid positive for life', to eventually become 'a Covid death'. In this way, viral deaths soar frighteningly. Not surprisingly, in this fear-inducing context, no figures for recovery from Covid were ever circulated, thus magnifying its potential in public eyes as a death sentence. As we have evidence of the UK weaponising fear (Dodsworth, 2021), we shouldn't be too surprised by such petty dramatisation. More perturbingly, is money the main reason for all this? Or does Covid and its vaccination shade into de-population in some way? The argument that politicians like Henry Kissinger (Moret, 2014) and philosophers such as Yuval Noah Harari (Harari, 2018) espouse is, 'we need to depopulate the planet out of necessity or we won't survive as a species'. It's an old cover-story. Evil always believes itself to be doing good. Over-population and the burden of an aging populace have been live issues for many decades. The older we get, the more pressure we put on state pensions, health services and public spending. Should a man of my age, of 75, in light of such logic, be allowed to live?

The masses have never thirsted after truth. They turn aside from evidence that is not to their taste, preferring to deify error, if error seduce them. Whoever can supply them with illusions is easily their master; whoever attempts to destroy their illusions is always their victim.

Gustav Le Bon

## **Formally Denied Side-effects of Vaccinations Now Emerging**

Maybe it is not COVID-19, but the government should come out and explain what's causing these

deaths. We don't have the freedom or the facts to say if it is COVID-19.

Adolf Mkonon

Official UK Government data show a 73 per cent increase in the number of young adults and teens suffering heart attack, myocarditis and stroke since the Covid-19 vaccine roll-out. Another study found Covid-19 vaccination increased the risk of suffering strokes by 11,361 per cent (Exposé, 2022e). Is this just the tip of the iceberg? When they discovered there was a spate of heart attacks in children post-vaccination, Pfizer added an extra anti heart-attack ingredient (Exposé, 2021), as if to acknowledge their culpability. 'Sudden Death Syndrome' appears to be a catch-all diagnosis, invented to cover vaccine-induced heart attacks, such as the worrying number of Professional Athletes (890) who suffered cardiac arrests and deaths (579) post-vaccination, plus FIFA's increase in football deaths to the tune of 300 per cent over the past year (Exposé, 2022e). So much evidence, yet authorities are still loath to link it formally to vaccination. But it's not just strokes; why are so many going blind post-vaccination? And how come Covid-19 vaccination increases the risk of suffering miscarriage by 1,517 per cent? And the poison cherry upon the vaccination cake: a recent study found Covid-19 vaccination increases risk of death by whatever cause by at least 4,800 per cent (ibid.)! Just let that sink in! Do you still want your booster shot?

Andreas Schöfbeck, a director of a large German medical insurer, reported that his company's data indicated that serious adverse effects are running at approximately ten times the official rate reported by the Paul Ehrlich Institute (PEI) – the official German vaccine regulator. Mr Schöfbeck got summarily fired for his troubles, despite only calling for further analysis. Two months on, an extensive study at the CharitéUniversitätsmedizin Berlin (a large medical research university owned by the Federal State of Berlin in Germany) came up with data from long-term observational research sustaining his findings. They reported: 'The number of serious complications after vaccinations against Sars-CoV-2 is 40 times higher than previously recorded by the Paul

Ehrlich Institute’ (HART, 2022). They further observed that suspected cases are not officially reported, and so the numbers of serious vaccination reactions at the Paul Ehrlich Institute remain significantly lower than in the Charité study (ibid.). As under-reporting is standard, it is estimated that only 10 per cent of serious reactions and between 2 and 4 per cent of non-serious reactions are ever reported. If only government advisors and others had read the *British Medical Journal*’s warning and had hesitated longer before adopting experimental and untested vaccinations (Doshi, 2021b). Sadly, the *BMJ*’s caution fell on deaf ears.

Damage to our immunity by vaccination just won’t go away. A CDC (Centre for Diseases Control & Prevention) study found that Covid-19 vaccination increases the risk of suffering Autoimmune Disease Myocarditis by 13,200 per cent; and another demonstrated that children’s risk of death due to lowered immunity increases by 5,100 per cent following Covid-19 vaccination compared to unvaccinated children (Office of National Statistics data). Add to this a peer-reviewed study by Scandinavian researchers who looked at 23.1 million people in Denmark, Finland, Norway and Sweden, concluded some two years ago, finding that the mRNA-based CVD ‘gene vaccines’ caused myocarditis and pericarditis, and we can’t say we weren’t fore-warned. Heart and vascular conditions, plus autoimmunity, shout out in all statistical returns – but where is investigative journalism on all this? Nowhere!

The UK National Health Service has also confirmed, in response to a freedom of information request, that ambulance call-outs relating to immediate care required for heart conditions doubled in 2021 and are still on the rise in 2022. But the most concerning figures, published by the Office for National Statistics, reveal that between January 2021 and March 2022, a total of 69,466 people died within 28 days of Covid-19 vaccination, and 109,408 people died within 60 days of vaccination in England (ONS, 2022). These figures did not emerge at the time! Doctors are also reporting ‘Sudden Adult Death Syndrome’ ever more amongst vaccinated adults under the age of 40,

and are consequently urging all under 40s to go for a heart check-up. Covid-19 vaccination is also being blamed for the UK Office for National Statistics data showing vaccinated adults aged 18 to 39 having a 92 per cent higher mortality rate (per 100,000) compared with unvaccinated adults. Public Health Scotland data similarly reveal that there has been a 67 per cent increase compared to the historical average in 15 to 44-year-olds suffering cardiac arrest, myocarditis, stroke and other cardiovascular diseases since this age group was offered Covid-19 injections. One can understand full well why the pharmaceutical companies negotiated a ‘no sue, no liability’ clause in their supply of public vaccinations. Again we have to accept the fact that untested vaccinations and profits came before responsibility or compensation for maimed lives!

*Authors’ comments:* Panic appears to be growing in many governments as the fully vaccinated obviously have a higher Covid hospitalisation rate than the unvaccinated. Growing figures also testify to the inefficiency of masks, lockdowns, vaccinations and Covid passports, thus opening the door for further litigation! The more so, as vaccine-induced AIDS, as viral authorities predicted 18 months ago, is now showing-up as fact! Is it not time we stopped calling the pandemic of heart attacks in the young ‘Sudden Death Syndrome’ and give them their real name – ‘Death by Covid vaccination’? This is, after all, the true cause, as governments well know. But why should governments support the truth when it means their political suicide? Understandably, medical doctors who supported vaccination and who advised their community accordingly are also reluctant to share statistics which make clear that ‘Vaccinated Young Adults’ have a 92 per cent higher mortality rate (per 100,000) than ‘Unvaccinated Young Adults’. Combine all this with ambulance call-outs for heart illness having doubled since the beginning of the Covid-19 vaccination campaign, and orthodox medicine has hung itself by its own petard!

But the wall is crumbling, for even a World Health Organisation (WHO) study (Exposé, 2022i) concludes that the risk of suffering

serious injury due to Covid vaccination is 339 per cent higher than the risk of being hospitalised with Covid-19! It is interesting timing for the WHO to now expose the inefficiency of vaccines, the very things they pushed: are they changing sides in order to survive an incoming tide turning against them? When the WHO and the *BMJ* agree on a point, don't ignore it. Will Big Pharma do the same and fess up, we wonder? Insurance companies in reports from 2019 (the last normal year before the pandemic) to 2020 (the year of the Covid-19 virus) report an increase in group death benefits of only 9 per cent; but group death benefits in 2021 when the vaccine was introduced increased by 164 per cent. Indeed the precise numbers for group death benefits taken from Lincoln National's annual statements for these years are 2019 – \$500,888,808; 2020 – \$547,940,260; 2021 – \$1,445,350,949 (Exposé, 2022h). An obvious trend! When commerce is God, all else, morals and Christian virtues become expendable!

There is also another area we need to consider: assisted deaths. It is now being suggested that we gave up two years of our life because Midazolam was used prematurely to end the lives of thousands of over 70s in care homes (Telegraph, 2021), though relatives were told their next of kin had died of Covid-19. Legalised murder, no less! Looking at the bigger picture, we were conned by health and government alike into believing that Covid was so very lethal! So the alternative motive? Euthanasia, or an experiment in population control? Such notions as these we deemed unbelievable two years ago, but now?... Lastly, regarding the prospect of vaccine-induced AIDS, this was prophesied in an official German government study to hit us by January 2022 (Exposé, 2022j). Guess what? It came right on cue! The amazing thing is, some people thrive following triple vaccination, so research is acutely needed to identify catalysts that counter the effects of vaccination; but there's a catch – grants for remedial research can't be allocated until vaccine damage is openly accepted; and forces remain at work hell bent on preventing this!

Logic can be met with logic, while illogic cannot – it confuses those who think straight. The Big Lie and monotonously repeated nonsense have more emotional appeal... than logic and reason. While the [people are] still searching for a reasonable counter-argument to the first lie, the totalitarians can assault [them] with another.

Joost Meerloo

## The Ineffectiveness of Vaccination

Success belongs to those who accept mistakes as stepping stones.

Hermann J. Steinherr

A report recently noted that 89 per cent of new Covid cases were mostly within the fully vaccinated, and another that the fully vaccinated account for a shocking 73 per cent of all Covid-19 deaths across New Zealand since the beginning of the pandemic in March 2020. Indeed, triple/double-vaccinated accounted for 81 per cent of the record-breaking numbers of Covid deaths in New Zealand in March/April 2022. Simply, in terms of Covid and its variations, we are currently in the midst of a pandemic of the vaccinated!

There is also another factor worth considering:

Those who had received a second dose over six months ago had higher monthly ASMRs (Autonomous Sensory Meridian Response) for deaths involving COVID-19 than those who had received a second dose less than six months ago, indicating possible waning protection from vaccination over time. (Office for National Statistics, 2022)

With the risks of side-effects and waning effectiveness, vaccinations appear to exacerbate the problem rather than resolving it! But if immunity is being compromised by vaccination, is it any surprise that more vaccinated folk are getting infected?

Pfizer research data of 80,000 pages, ordered recently to be delivered to the law courts by a High Court Judge, whom they had approached for the opposite (namely, 50 years legal restriction from public access under the Data Protection Act) proves beyond doubt that they

knew that vaccinations harmed pregnant women, and that the vaccine was only 12 per cent effective – though they claimed it to be 95 per cent successful! So what can we trust about them? Nothing! Truth will eventually out, but too late for too many.

Not only are vaccinations ineffective, they are downright dangerous! Figures from the United Kingdom's PHE Vaccine Surveillance Report UK (Government UK, 2021) suggest that 'fully vaccinated' people are losing on average about 5 per cent of their immune systems function per week! It is further reported that doubly injected 'People aged 40–69 have already lost 40% of their immune system capability and are losing it progressively at 3.3% to 6.4% per week' (ibid.). And yet still government continues to push vaccination! We pray that the above figures and predictions are wrong, or that our bodies can eventually manufacture counter-measures to stop this deterioration.

*Authors' comments:* We wish to apologise to our readers that some of our quotations cannot be fully referenced, as they were taken off the web before we had time to fully record them! Having said this, enough websites remain to support the conclusion that the fully vaccinated are nearly three times more likely to die of Covid-19 than the unvaccinated. We wonder how people will feel having been conned into considering a proven useless Covid injection with life-threatening side-effects. Not forgetting ever more follow-up boosters where you are being asked to willingly accept an even greater risk to your health. We personally know of too many local cases where vaccination has heralded cerebral changes, cardio-vascular problems and autoimmune reactions, for us to doubt the above statistics. Small blood vessels in the eye, brain and heart especially seem to suffer. As we write, ever more variants are being conjured up, and we're being offered further vaccinations for vaccination-induced diseases! A brilliant commercial plan for Big Pharma yet again!

It is no small wonder that statistics are causing government concern, with the fully vaccinated on the international scene having a higher Covid hospitalisation rate than the unvaccinated, and

the triple vaccinated now up to five times more likely to be infected with Covid-19 than the unvaccinated. But this is small wonder when vaccine effectiveness has fallen as low as minus 391 per cent! Another study confirmed that Covid vaccines were causing severe Autoimmune-Hepatitis days after the WHO issued a 'Global Alert' about a new severe hepatitis strain spreading amongst children! Was the WHO offering a cover story for its vaccines side-effect? And why, when we Google for 'Covid vaccination side-effects', do we get sore arms and headaches but nothing about serious side-effects? As we write, an extensive, wide-ranging study by several universities, plus the editor of the *British Medical Journal*, report via the Social Science Research Network (SSRN), in a pre-print article, that Covid vaccines are more likely to put you in hospital than keep you out (Fraiman et al., 2022). We rest our case. The 'cure' is obviously far worse than the disease!

Totalitarianism is man's escape from the fearful realities of life into the virtual womb of the leaders. The individual's actions are directed from this womb – from the inner sanctum man need no longer assume responsibility for his own life. The order and logic of the prenatal world reign. There is peace and silence, the peace of utter submission.

Joost Meerloo

## Culpability of Big Pharma

Medicine being a compendium of the successive and contradictory mistakes of medical practitioners, when we summon the wisest of them to our aid, the chances are that we may be relying on a scientific truth the error of which will be recognised in a few years' time.

Marcel Proust

Pfizer, from their earliest vaccine trial-runs, kept 'adverse reaction reports'. These testify to the fact that they were already aware of 1,223 deaths and 42,000 complaints describing 158,893 side-effects! Obviously this is less a case of negligence than it is crime. For they knowingly released a dangerous drug upon the population. Kean Bexte, an independent journalist formerly employed by *Rebel News*, pointed out how 1,223 people died within the first 28 days after being

inoculated with the BioNTech Pfizer vaccine during trials, and it was still approved for use (<https://t.co/BPxXvjUTsa>)! Many are justifiably angry that the vaccine was allowed on to the open market despite all proven risks. Pfizer are yet again demonstrating that money comes before lives! Just 90 days after the release of Pfizer's mRNA vaccine, they knew and reported mounting deaths and side-effects under a heading of 'general disorders' (note how death is subsumed here under 'general disorders'); the most frequently reported dysfunctions were nervous-system ones – over 25,957. Still, Pfizer went full-steam ahead without further investigation.

'The immuno-compromised SHOULD NOT be given Covid injections' – so said the AstraZeneca CEO; this again tends to confirm that Big Pharma was alerted to the autoimmune side-effects of its vaccines from the earliest trials! Even the key inventor of mRNA vaccine, Dr Robert Malone, is on record as challenging the lack of transparency regarding vaccine side-effects. He is pro-vaccination, but considers the withholding of side-effects to be unethical. He is especially concerned about the true number of cardio-vascular complications, which he claims to be 20 per cent higher than reported. Public Health Officials are thus forced to make policy on a best-guess rather than on a factual basis.

Robert F. Kennedy Jr's book *The Real Anthony Fauci* reveals how Fauci launched his career during the early AIDS crisis. It is claimed that Fauci partnered with pharmaceutical companies to sabotage safe and effective off-patent treatments for AIDS, and orchestrated a series of fraudulent studies, before pressurising US Food and Drug Administration (FDA) regulators into approving a deadly chemotherapy treatment he had good reason to know were worthless against AIDS, but which made him money! Kennedy further alleges that Fauci repeatedly violated federal laws to allow his Pharma partners to use impoverished and dark-skinned children as lab-rats in deadly experiments with toxic AIDS and cancer chemotherapies. Strangely, in the sue-happy USA, Kennedy's account has not been legally contested by Fauci!

Pfizer is on public record since 2000 as paying over \$4,660,896,333 (four thousand six hundred and sixty billion, eight hundred and ninety-six thousand three hundred and thirty-three dollars) in 71 criminal fines due to corrupt practices, inclusive of false claims; flaws in drug and medical safety; unapproved off-label promotion of medical products; missing research and healthcare records; improper government contracting and competition; plus environmental violation. It has also been repeatedly found guilty of negligence, fraud and bribery over the past two decades and fined accordingly, but was seemingly too established to be brought down! Why should we trust their plea for more preventative vaccines? – especially in light of a Bio-distribution Study of Pfizer Covid-19 injections, which suggests that the use of mRNA vaccines should be suspended immediately! How could a company like this be let continue to practise? We guess we must never underestimate the power of bribes and the willingness of officials to accept them.

*Authors' comments:* Big Pharma got itself quite a business plan! Working first with the WHO to dilute the definition of 'pandemic'; spending billions cozying-up medico-political support via free lunches and cash incentives; pouring money into viral research, and when a suitable candidate came along, declaring it – with the WHO's blessing – a 'pandemic'. They even committed the worst sin of all – vaccinating at the height of a pandemic, thus forcing the virus to mutate to survive. Even first-year student nurses know that this is dangerous and reckless! Now they could bring in their previously prepared vaccinations, but only after coaxing governments into signing-off their culpability for side-effects. All was set thereafter to offer lame experimental vaccinations over-and-above existing legal safeguards and law. And when these untested vaccines produced variants such as Alpha, Amicron, Delta and Monkeypox, vaccinate against these also! A grand plan, don't you think? Commercially sound, ethically barren.

We must also note the concerted effort to suppress the following alternative treatments:

- HYDROXYCHLOROQUINE – used by tens of thousands of physicians worldwide, FDA-approved for over 65 years, considered a safe and virtually 100 per cent effective medicine for Covid-19.
- BUDESONIDE – discovered as a 100 per cent effective cure for Covid-19 by Dr Richard Bartlett, whose randomised trial saw over 500 Covid patients recover.
- IVERMECTIN – Dr Pierre Kory treated numerous corona patients to discover that Ivermectin is a true miracle drug for Covid-19. A more recent study by ten medical experts reviewed the evidence and concluded that Ivermectin both prevents and cures Covid-19.
- CHLORINE DIOXIDE – biophysicist Andreas Kalcker was reported as bringing down the Covid daily death rate in Bolivia from 100 deaths a day to almost zero with this substance he has researched for over 13 years.

So why were alternative treatments not investigated more, rather than quashed so quickly: follow the money line and ask who has most to gain. It all boils down yet again to money before lives! And when ‘mass formation’ cum collective hysteria was cited to explain the population’s sheep-like acceptance of vaccination, Gates and Big Pharma likewise rubbished the work of all scholars associated with mass hysteria, from Gustave le Bon to Mattias Desmet. Bill Gates even put out media messages saying it was a made-up term with no value! From Nazis to Covid and back again. Lies from the powerful masquerade as shining truths.

The world is in the grips of mass formation – a dangerous, collective type of hypnosis – as we bear witness to loneliness, free-floating anxiety, and fear giving way to censorship, loss of privacy, and surrendered freedoms.

Mattias Desmet

## **Draconian Intentions of Governments and the World Health Organisation (WHO)**

The worrying issue is that all levels of government – not only federal – are abusing the emergency

decree to continue with direct awards without any restrictions.

Eduardo Bohórquez, director, Transparency Int.

Research undermining the effectiveness of face masks suddenly became political when Covid arrived. What are we to believe? The facts, or political messaging? The accepted research findings in total confirm that face masks lack efficacy, while the adverse physiological, psychological and health effects of masks are clearly established. Note Dennis Rancourt’s exhaustive review of all existing scientific literature on face masks, which concluded that masks offer no protection against viruses (Rancourt, 2022)!

Quote:

No RCT study with verified outcome shows a benefit for HCW or community members in households to wearing a mask or respirator. There is no such study. There are no exceptions. Likewise, no study exists that shows a benefit from a broad policy to wear masks in public. (ibid.)

Two final points on this. First, during the Spanish Flu in 1918–19 most people died of bacterial pneumonia caused by the extensive wearing of masks. Secondly, as any bright school-boy or -girl will tell you, at the molecular level viruses are too small to be deterred by paper face masks; they fly right through the molecular structure of paper masks – like trying to repel mosquitos with chicken wire! Yet governments went ahead enforcing masks and lockdowns, though both were proven to be scientifically indefensible! Forcing the population into masks would therefore seem more an issue of control than one of preserving health.

As director of the National Institute of Allergy and Infectious Diseases (NIAID), Dr Anthony Fauci dispenses \$6.1 billion in annual taxpayer-provided funding for chosen scientific research, allowing him to dictate the subject, content and outcome of scientific health research across the globe. Fauci uses his financial clout to wield extraordinary influence over hospitals, universities, journals and thousands of influential doctors and scientists – whose careers and

institutions he has the power to ruin, advance or reward in an authoritarian manner. As an influential force within the WHO, Fauci has played a major role in the mess we are now in. J.F. Kennedy Jr has gone on public record stating that in early 2000, Fauci shook hands with Bill Gates in the library of Gates' \$147 million mansion, cementing a partnership that would aim to control an increasingly profitable \$60 billion global vaccine enterprise with unlimited growth potential (Kennedy, 2021). Through funding leverage and carefully cultivated personal relationships with heads of state and leading media and social media institutions, the Pharma–Fauci–Gates alliance exercises dominion over much global health policy. But hopefully not for much longer, as this truth is now out in Kennedy's best-selling book.

An investigative 229-page report that came out early in the Covid game (in 2020) by a consortium of Reserve French Army Officers drew links between the Gates Foundation, the WHO, 5G technology, governmentally controlled vaccination, and bribes. It identified that the Covid-19 pandemic as troublingly being 'foreseen' by representatives of the military-industrial complexes, governments, pharmaceutical giants and shadowy 'philanthropic' organisations. As for the reasons for Covid: 'The management of the "health crisis" seems to be a pretext for a totalitarian global take-over, inclusive of an intention to impose a global cryptocurrency, a vaccine with nano-chips and a subcutaneous electronic chip' (AFRAO, 2020). This report identified massive corruption at the heart of the WHO; it saw Covid-19 as a biological and electromagnetic war supported by a vast 'smoke-and-mirrors' operation designed to sow confusion among the ranks of medical and hospital personnel; it speculated that 'Covid-19' could be the preparation for a much larger-scale joint operation, combined with a further smokescreen to conceal large-scale tests of the 5G weapon for criminal ends that remain to be clarified. Links were also made between 5G installations, both terrestrial and aerial (Elon Musk's satellites in low-Earth orbit), as all part of a 'total war project'. This independent inquiry was labelled

as a 'conspiracy theory' and left unreported by the mainstream media. It may read in part as somewhat over-stated but... could it be nearer the truth than we care to realise? 'The Great Reset' is set to occur this next year or two. So time will no doubt tell.

Some 160,000 Covid deaths were claimed by the UK government, yet the National Health Service confirms that just 5,115 people have died of Covid-19 in England since the beginning of pandemic. As earlier stated, we can't reference this because the UK government has taken anti-Covid statistics down from its statistical and health service public-view websites! A similar governmental falsified over-estimation of deaths was also discovered in the USA, where Centers for Disease Control and Prevention (CDC) was directed to not count anybody as vaccinated within the first 14 days, until their second dose; so those who suffered death or side-effects within this period would enter the records as unvaccinated! – thus blatantly falsifying the statistical returns.

Governments worldwide, it appears, are working in lock-step fashion to bring in Digital ID and a social credit system. The EU has already agreed to expand online censorship with a 'Digital Services Act'. In similar vein, Vienna is becoming a testing ground for a Chinese-style social credit system, and Canada is moving forward with plans to implement the digital coding of population, while Italy has announced the roll-out of a dystopian social credit system where compliant citizens will be rewarded for 'good behaviour'. The CIA has also been implicated in the production of digital passports. All of this is much in keeping with the digital identity introduced by Nigeria's federal government, which has ordered telecommunication companies to bar calls from phone numbers not yet linked to a National Identity Number. Today Nigeria, tomorrow the world! But you see the pattern: control and monitor the masses, irrespective of human dignity or civil rights or individual privacy. The bottom line: our governments don't trust us, and we don't trust them!

*Authors' comments:* As eluded to earlier, the UK Health and Security Agency has been forbidden to publish any further statistical data on Covid-19 cases, hospitalisations and deaths by vaccination status, because its figures embarrassingly show that the triple-vaccinated population is on the verge of developing Acquired Immunodeficiency Syndrome, and the double-vaccinated are suffering Antibody-Dependent Enhancement. In this way, the truth is formally buried. So the UK government uses hardworking taxpayer's money to advance their agenda to control an official version of 'the truth'. The Ministry of Truth is patently invested in mis-truth in the UK! The handling of Covid-19 has, as hinted at earlier, been cited as preparation for 'Agenda 2030', a United Nations initiative whose shadow intentions, if not its press release, support a system of total worldwide centralisation of power, influencing everything from governments to the free market economy via the subversive goal of full centralisation – to allow a handful of people to micro-manage every aspect of trade and business. The WHO and the UN ardently back Agenda 2030 and seem to be working towards a like goal. Covid is seen by some as an initial experiment serving the creation of this economic empire, where a concept called 'The Sharing Economy' is created, in which people own less property and have less privacy. Perhaps it sounds far-fetched, but a lot of material on the internet speaks of a banking reset geared towards ensuring the security of existing power holders. Worryingly, Obama, Zuckerberg and Gates have acknowledged adopting the philosophy of Yuval Noah Harari, a popular philosopher who states that the role of culture is to forbid (Harari, 2018). He acknowledges that if governments and corporations succeed in hacking the human animal, the easiest people to manipulate will be those 'who believe in free will' – humanists like our good selves, no less! Harari observes:

We now have the technology to hack humanity and let everyone think and feel what we want. Tyrants always wanted to do that, but now for the first time we have the ability to do this. We will eradicate faith in God, end all free will, and make sure that humans think exactly what we want them to think.

His book *21 Thoughts for the 21st Century*, which supports the political lobby for population reduction, was promoted extensively by Bill Gates, who wrote a foreword on the cover. More disturbing is that Harari is being massively promoted by the United Nations, the World Economic Forum, the World Health Organisation – hence, Agenda 2030? The spectre of de-population seemingly won't go away.

5G was cited earlier as linked to depopulation and mass control: it was referred to by the president of Chile, who threatened on national TV: '5G will not only read your thoughts, it will insert thoughts and feelings. And we will make sure it reaches every home in the country.' What a charming fellow – not! The jury is out on whether this is rhetoric or fact. The military, Big Tech and various governments have all been implicated as playing their part in 2030, now said to be in its final stages. Ten years ago we would have laughed at such notions; now, we seriously consider them. Lastly, we must with great sadness note that many sources, both governmental and pharmaceutical, are beginning to suspect that the Covid-19 vaccination may lead to mass depopulation. Confidential Pfizer documents which the US Food & Drug Administration has released by court order confirm a similar scenario. One is caused to remember a Henry Kissinger memo leaked out from the US Government in 2014 that seriously considered depopulation as a viable way forward (Moret, 2014).

Modern technology teaches man to take for granted the world he is looking at; he takes no time to retreat and reflect. Technology lures him on, dropping him into its wheels and movements. No rest, no meditation, no reflection, no conversation – the senses are continually overloaded with stimuli. [Man] doesn't learn to question his world any more; the screen offers him answers-ready-made.

Joost Meerloo

## Press and News Suppression

It is a furor of disinformation and attacks – one in which credible journalists are subjected to online violence with impunity; where facts wither and democracies teeter.

Julie Posetti

A volume entitled *Journalists for Hire* (Ulfkotte, 2020) tells how perks are used to bribe writers and opinion makers to twist their reports. It illuminates first-hand how a tone of corruption is set from the top – ‘play along, or quit’. Plus, to what degree the long arm of a NATO press office enrolls media to get Europe to support foreign wars. The press as a political tool? Just like the old communist days, is it not?

J.F. Kennedy’s recent book, referred to earlier, lays bare just how Fauci and Gates control the media outlets, both conservative and liberal news services, as well as scientific journals, plus key government and quasi-governmental agencies, global intelligence agencies and influential scientists and physicians so as to flood the public with fearful propaganda about Covid-19’s virulence and pathogenesis. Power to muzzle, debate and censor dissent. As noted earlier, Kennedy has not been sued for these accusations, so they would appear to be true. The aforementioned whistle-blower Ulfkotte (2020), a respected journalist in his own right, reported how government-inspired under-cover agents wrote articles in editorial offices that were subsequently published later under the names of well-known journalists. Ulfkotte also pointed out which journalists received bribes for their warped reporting, plus how prestigious ‘journalism prizes’ were a reward system for co-operation, going so far as to name who received them. He further evidenced that respected journalist names and outwardly respectable organisations like the Trilateral Commission and German Marshall Fund were behind-the-scene players, and were regularly paid to influence German media with one-sided propaganda. Ulfkotte subsequently died later under suspicious circumstances (Schneider, 2020).

For evidence of how the bought press turns upon the free press, we need look no further than the case of Dr Rancourt, who we heard earlier dared speak against the official narrative of face masks. Like many other scientists whose findings had a potential to rock government policy and pharmaceutical desires, Dr Rancourt had his academic reputation tarnished and his profile removed from ‘ResearchGate.net’. A host of character assassinations and de-bunking of his

findings rapidly followed – flooding the internet. John Hardie’s world-renown study which proved that masks increase infection (Hardie, 2016) was likewise dug up from the past to suffer a similar debunking fate when the pandemic arrived. The new black is obviously white! And truth is as ever decreed by those in power who re-write history.

The COVID-19 pandemic has demonstrated how vital it is for people to be able to speak out and share information. And yet medical professionals, journalists, activists and others who have informed the public or questioned the way the crisis has been handled have faced harassment and attacks. (IFEX et al., 2022)

So speaks a professional body representing journalists. In the UK, a pincer movement by the Treasury and OFCOM – the UK’s communications regulator – gagged our once-proud news media through threats of fines and sanctions, should they dare to go against government narratives. Not that the UK’s the only culprit. In its 2021 Index, Reporters Without Borders (RSF, 2022) reported a ‘dramatic deterioration in people’s access to information and an increase in obstacles to news coverage’. The RSF goes on to state that the COVID-19 pandemic has been used to prevent journalists from accessing other wide-ranging information so as to restrict critical reporting. According to RSF’s international survey,

... journalism is currently completely blocked or seriously impeded in 73 countries and constrained in 59 countries. Taken together, these figures represent 73% of the 180 countries assessed. Only 12 out of the countries ranked are deemed to have a free and favorable environment for journalism (one fewer than last year): Norway, Finland, Sweden, Denmark, Costa Rica, Netherlands, Jamaica, New Zealand, Portugal, Switzerland, Belgium and Ireland. (Torsner & Harrison 2022)

Look at the glaring absence of the USA and the UK, France and Germany from this list! While the UK merely took down the national statistics website relating to Covid deaths, in Iran the authorities imposed measures to prevent news media from scrutinising the pandemic-related death toll, and in Hungary and elsewhere, anti-fake

news laws effectively criminalize legitimate journalistic reporting on the pandemic.... Cases abound of how the ‘COVID-19 excuse’ has led to the inability of journalists to do their job of reporting medically endorsed effective public health measures, or to challenge lethal disinformation. (ibid.)

So we have a ‘gagged press’, not a ‘free press’, and propaganda rather than factual reportage peppers our news (HART, 2021). Investigative journalists continue to have their hands tied behind their backs... – speak truth at your peril, perhaps!

*Authors’ comments:* The UK government, while professing to be democratic, uses public money to bribe a publicly funded news media – the BBC – to fear-bombard the public with government-approved propaganda furthering its political agenda (HART, 2021). They are also reported as paying experts in mass psychological manipulation to preserve their standpoint as the one and only way (Dodsworth, 2021). There really is no room left to doubt press censorship. Journalists themselves are likewise very concerned (Mathiason, 2022). In terms of the impact Covid-19 is having on media, there has been a renewed closure of civil space, especially in more authoritarian countries. In Egypt, for instance, there are new laws to suppress reporting, and leading journalists have been arrested. In Myanmar, under the cloak of Covid-19/fake news, independent media have been shut down (ibid.) – all of which is deeply worrying. Sadly, the UK can’t report its own government abuses for fear of OFCOM fines and Treasury reprisals! Hypocritical, or what? Hence, dissenting articles like ours find a home in *Self & Society*!

The social transformation that unfolds under totalitarianism is built upon, and sustained by, delusions. For only deluded men and women regress to the childlike status of obedient and submissive subjects and hand over complete control of their lives to politicians and bureaucrats.

Joost Meerloo

## Over-estimation of Vaccine Take-up

Misinformation is a virus unto itself

Brianna Keilar

Contrary to what the press and TV say, fewer than half living in parts of London, Birmingham and Leeds have had the first Covid jab, and statistics indicate below the 50 per cent vaccination mark in 13 other wards dotted across the country, including Oxford. Tellingly, the lowest uptake for vaccinations was amongst Ph.D.’s! Well read and informed researchers.

Even the UK Government report admits that some 19 million people in England have not had a single dose of a Covid-19 ‘vaccine’, and another 12 million refused a second or third dose. Probing a little deeper into the 19.2 million unvaccinated, a further 2.6 million who had the first dose refused the second dose, and a further 9.1 million who had the second dose refused the third dose (Fearless Speech, 2022) – bringing the possible number of people who have now woken up to the lies and propaganda spouted over the past two years up to 30.1 million.

A similar case to the above is reported for the USA. In light of Mr and Mrs average Joe seeing the ineffectiveness of vaccination for preventing repeated Covid infection, plus witnessing damaging side-effects on their family, neighbours and friends, is it really surprising that the CDC (Centers for Disease Control and Prevention) reports that 74.2 million people in the USA have not had a single dose of a Covid-19 vaccine, and another 157 million have refused a second or third dose? Are, you dear reader, aware of friends or acquaintances of yours who have suffered effects? Many are seeing through earlier hype. Are sheep now changing into rams?

*Authors’ comments:* In an earlier report we mentioned that if you once test positive in the UK you can end up being registered ‘Covid positive for life’, to sooner or later be attributed ‘a Covid death’! Such ploys as this cause Covid deaths to soar frighteningly. One could easily be led to believe that no one recovers from Covid. But almost all recover unless with serious medical pre-conditions, or if incubated or

otherwise harmed by medical intervention. So much statistical subterfuge! Hopefully the refusal of vaccination is evidence of the masses waking up to the harm inflicted upon us.

But the order of a totalitarian world is a pathological order. By enforcing a strict conformity, and requiring a blind obedience from the citizenry, totalitarianism rids the world of the spontaneity that produces many of life's joys and the creativity that drives society forward.

Joost Meerloo

## Concluding Summary

Historically, pandemics have forced humans to break with the past and imagine their world anew. This one is no different. It is a portal, a gateway between one world and the next. We can choose to walk through it, dragging the carcasses of our prejudice and hatred, our avarice, our data banks and dead ideas, our dead rivers and smoky skies behind us. Or we can walk through lightly, with little luggage, ready to imagine another world. And ready to fight for it.

Arundhati Roy

When you join up the dots of information we've arrayed before you, where does your reasoning take you?

For ourselves, reluctantly, we believe that there is just too much data coming out to believe that Covid was a simple virus. Military-path lab involvement and patent-office records, plus records of WHO machinations, produce too much evidence of fore-knowledge and fore-preparation from such wide-ranging sources, as to suggest Covid was manufactured and planned on a massive, co-ordinated scale. Mass corruption from State governments and State suppliers of health, pharmaceuticals and the WHO are all evidenced as keeping it going. Bribes of a very high calibre oiled the workings, and governments silenced the press and TV. Though in the UK the public-facing puppets kept it going almost seamlessly, here in Romania we saw through the cracks much sooner, as public-facing systems were more flaky, and politicians less organised.

We wish there were more data that a straightforward virus was merely miss-handled and further proof that our conclusions are faulty. For there are no winners here. But such reliable sources as the *British Medical Journal*, the Data Science Association, the Health Advisory & Recovery Team, the International Freedom of Expression Exchange, the Social Science Research Network, the UK Office for National Statistics, the UK Statistics Authority and far too many established university-led research studies, plus records of The Patents Office, back our findings. Deep down, we sincerely hoped we were wrong, but we can't find reliable verification that we are. So we end up believing that governments, spurred on by Covid, have ridden rough-shod over common good, human dignity and human rights, while exiling humanitarianism and empirical observation to the wastelands. Consequently, personal liberty has been restricted, justice and rationality suspended, and social responsibility and love all but forgotten – the very things that make life the more worthwhile. In this light, as humanists we feel morally compelled to write, as to sit idly by like moral cowards is not a self-respecting option.

It took us some time to catch up. Sinziana comes from a medical family, and my first career was as a nurse and nurse teacher. Until Covid came along we both believed in vaccination. We were reluctant dissenters, though ardent researchers; but research won us over in the end. In earlier *Self & Society* articles we were genuinely perplexed; but because we couldn't find evidence to the contrary, we ended up where we are now. But this story is not about us.

At the last, the vaccinated are the ones paying the price. We fear they are facing the prospect of a life vexed by possible auto-immunity and cardio-vascular problems ahead, not to mention shortened life expectancy. This is a very hard reality to face, and we are past anger on this issue.

We know most people feed off the television and newspapers for their shot of truth, taking all other sources as suspect, so we will likely be enthroned further as conspiracy theorists. But

please, at least, survey the headlines of the references below to glean something of what propaganda is denying you. Feel free to shoot us down as the messengers, but we beg of you – take no more booster shots.

It's easier to fool people than to convince them that they have been fooled.

Mark Twain

## About the contributors

**Dr Paul Barber** (Ph.D., M.Sc., B.A.) is a retired Professor of Psychotherapy and Research and a Gestalt Therapist with a background in Therapeutic Community Practice and Humanistic Education (Human Potential Research Group, UK). A retired academic researcher and psychotherapist with a background in mental health and humanistic education, he is appalled by the deceit and corruption at play in the Covid crisis, and how willing the population is at large to sleep-walk through the whole sorry farce ([gestaltinaction@msn.com](mailto:gestaltinaction@msn.com)).

**Sinziana Barber** (M.Sc., B.A.) is a published and awarded poet, clinical psychologist and psychotherapist, and also an alternative health practitioner. She is rapidly losing faith in government, allopathic medicine and the discernment of much of humankind in general; and is very concerned about the world Lily, her seven year-old daughter, will inherit. ([sinzibarber@gmail.com](mailto:sinzibarber@gmail.com))
